## **SION FOR GLASS BLOCK CONSTRUCTION**

The MARMET VENTILATOR is a practical, newly designed, wall ventilator window which provides ventilation and vision for glass block construction. Enhances the beauty of a glass block panel.

Frames are available in extruded aluminum and heavy gauge mild steel. Channels are 4-1/4" inside dimensions to allow 3/16" on each side for caulking. Extruded Aluminum sash are used on all ventilators. No lintel is required for the installation of MARMET VENTILATORS because they are sturdily constructed and carry the stress put on it by a glass block panel. When installing size 4024 or larger, it is advisable to brace the opening with a wood prop in the center while the panel is under construction.

MARMET VENTILATORS may also be used to advantage in groups, side by side, or one above the other, where a larger area of vision or outside ventilation is desired.

Because there are many requirements as to types and thicknesses of glass, all our ventilator prices refer to unglazed units. Ventilators may be ordered glazed to suit your needs and glazing will be billed at prevailing local prices.

Screens for all sizes are available with steel frame and bronze wire or with aluminum frame and aluminum wire cloth.

MARMET VENTILATORS are available in fourteen stock sizes as listed below and special sizes will be built in quantity lots to your specifications.

Sizes 2424 and 3624 may be used with six and twelve inch glass block. All other sizes, including 2424 may be used with eight inch glass block.

### **Specifications**

General conditions of the contract are part of these specifications.

**SCOPE OF WORK** -- Contractor to furnish all ventilators as shown in plans and specifications and install same in a workmanlike manner.

**MATERIALS** -- Ventilators shall be constructed of (Aluminum, Mild Steel) as manufactured by the MARMET CORPORATION, Wausau, Wisconsin, of sizes as shown. Set in the same mortar as used to lay blocks. Glazing will be done with ----- glass.

**SCREENS:** Furnish and install removable ----- screens.

**CAULKINGS:** Mastic caulking shall be applied evenly and to the full depth of joint in and outside perimeter of ventilator.

**CLEANING** -- Ventilators and Screens to be left clean on completion.

**PAINTING** -- Steel units shall be painted over factory prime coat before installation.

# MARMET VENTILATORS

RIBBON WINDOW INSTALLATIONS as shown above may be used below glass block panels when continuous vision or maximum ventilation is needed. Ribbon windows are particularly adaptable in schools, commercial, industrial, and other installations. Additional information on the ribbon window installations sent upon request.
